

Computing and Business Faculty Assessment Plan

Deep-level marking of student work – Autumn Term 2 – from November 2019

Year Group	Subject	Description of task(s) that students need to complete (taking into consideration group rotations as appropriate)	Details of how the work is expected to be marked and assessed	Location where the completed student work can be evidenced
7	Computing	Students will be creating and reviewing a final animated piece for the stop motion they worked on.	The work will be produced by the student on the computer at Belper School. The student will save and store the work in Google classroom which will then be submitted to the teacher who will assess this against set criteria of levels and achievements.	The work can be located inside students local folder/and or Google Drive.
8	Computing	Students will create a mini project for Mayhem Manor. This will involve creation of a website and marketing literature.	The work will be produced by the student on the computer at Belper School. The student will save and store the work in Google classroom which will then be submitted to the teacher who will assess this against set criteria of levels and achievements.	The work can be located inside students local folder/and or Google Drive.
9	Computing	Students will produce a program using Python to meet a given demand/scenario.	The work will be produced by the student on the computer at Belper School. The student will save and store the work in Google classroom which will then be submitted to the teacher who will assess this against set criteria of levels and achievements.	The work can be located inside students local folder/and or Google Drive.

Year Group	Subject	Description of task(s) that students need to complete (taking into consideration group rotations as appropriate)	Details of how the work is expected to be marked and assessed	Location where the completed student work can be evidenced
10	GCSE Computer Science	Students will complete a set of short and long answer exam questions based on the work that they have completed between the start of November and before the end of the December half term break.	This work will be produced by the student on the computer at Belper School. The student will print out the work and this will be marked by the teacher.	The work can be located inside the students' exercise book or folder.
10	Cambridge National Information Technologies	Students will produce a spreadsheet model and a database in preparation for the controlled project later on in the year.	This work will be produced by the student on the computer at Belper School. The student will print out the work and this will be marked by the teacher.	The work can be located inside the students' exercise book.
11	GCSE Computer Science	Students will complete a set of exam questions based on the learning they have gone through in Autumn	The work will be completed by the student on the computer and submitted electronically for marking in Google Drive.	The work can be found within the student's area.
11	Cambridge National Information Technologies	The students will be completing the final stages of their controlled assessment projects.	The work will be completed by the student on the computer and submitted electronically for marking in Google Drive.	The work can be found within the student's area.
12	A Level Business	Students will complete a set of exam style questions which will be based on the Human Resource unit they have recently studied.	The work will be submitted using a Google Form. This will be marked by the teacher and fed back to the student.	The work can be located within the students folder on Google Drive.
13	BTEC Level 3 ICT	Students will be working on Learning Aims B and C for Unit 6 – Website Development. They will be producing a website for the company that meets the requirements within the brief.	The student using word processing techniques will complete the work. This will be then printed and placed inside the students' project folder. Work will be marked at the final deadline, again listed on the front of the folder.	The work can be located inside the students project folder.

Year Group	Subject	Description of task(s) that students need to complete (taking into consideration group rotations as appropriate)	Details of how the work is expected to be marked and assessed	Location where the completed student work can be evidenced
13	BTEC Level 3 - Computing	Students will be developing the interactive elements for the game they are producing for the Computer Games unit.	This work will be produced by the student on the computer at Belper School. The student will print out the work and this will be marked by the teacher.	The work can be located inside the students project folder.
13	A Level Business	Students will be completing a set of exam questions based on the work that they have completed this half term.	The work will be produced by the students on the computer at Belper School. The student will submit this to the teacher for marking.	The work can be located inside the students' area on the computer.
