Brief outline of course

Core Maths is a level 3, one year course equivalent to an AS, which provides students with a 'maths for life' education and supports them with the maths requirements in their other subjects. It is for anyone who has achieved at least a grade 5 in GCSE maths and is usually studied alongside 3 A levels. Students will solve problems involving finance, statistics, and estimation by studying Core Maths and develop their critical thinking skills.

Are you interested in:

- Data analysis
- Critical analysis
- Personal finance
- Data handling
- Logical thinking
- Real world scenarios

Mathematics is a basis for so many careers and it will teach you vital transferable skills such as the ones listed above. There is always a demand for people who have these qualities and employers will recognise that you have them if you have studied mathematics.

Leading to a career in:

Any career involving an element of problem solving including:
- IT support specialist
- Social worker
- Psychologist
- Event coordinator

Subject Entry Criteria

GCSE Maths Grade 5
